Education

University of Toronto

Sep. 2023 – May 2028

Honors Bachelor of Science, Double Major in Computer Science and Commerce; Minor in Statistics

GPA: 3.82

Relevant Coursework: Data Structures & Algorithms, Software Design, Database Systems, Intro to Machine Learning, Regression Analysis, Numerical Methods, Algorithm Design, Linear Algebra II, Probability & Statistics II

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, SQL, C/C++, HTML/CSS, Bash

Frameworks: React, React Native, Next.js, Node.js, NestJS, Flask, Django, TensorFlow, PyTorch, Pandas, NumPy, Firebase, Firestore, REST APIs

Developer Tools/Platforms : Git, Docker, Linux, CI/CD, AWS, Supabase, Azure DevOps, Zuora, Zuora Workflows

Experience

Enercare

May 2026 – August 2026

Software Engineer Intern

Markham, ON

- Billing and payment systems at enterprise scale

CAME - Canadian Association For Medical Education

Apr 2026 – Jun 2026

Software Engineer

Ottawa, ON - Remote

- Engineered a **full-stack web platform** for CAME end-to-end as a **2-person team**, interfacing directly with CAME President Marcus Law and Foundation Chair Dr. Deena Hamza to gather requirements, present technical decisions, and align delivery with organizational objectives using **Next.js, TypeScript, Node.js, and PostgreSQL**
- Introduced a **Figma-to-production pipeline** via **MCP server integration**, eliminating manual handoff and **accelerating frontend development**
- Architected and executed a **full cloud migration** to a **serverless Vercel deployment**, cutting projected annual infrastructure costs by **85%** while improving **scalability, performance, and long-term maintainability**

Evolvere Mental Health

Jan 2026 – Apr 2026

Software Engineer

Mississauga, ON - Remote

- Built and **shipped a production IOS mental health platform** end-to-end using **React Native, TypeScript, Firebase, Firestore, and Node.js**, releasing **5 app store versions** and supporting **1000+ students**
- **Architected a scalable serverless backend** by designing **Firestore data models, real-time synchronization, Firebase Authentication, and Cloud Functions**, enabling secure, low-latency user interactions and production-ready application scalability
- **Optimized platform performance and user experience** by improving forum rendering, reducing on-boarding friction, and iterating on core product features to increase application responsiveness, usability, and long-term engagement

University of Toronto - Department of Computer Science

Sept 2025 – Apr 2026

Software Research Assistant

Toronto, ON - Hybrid

- **Developed static program analysis infrastructure** for **PythonTA**, extending **AST-based semantic analysis, type checking, and control flow analysis** to improve automated code diagnostics across **1000+** submissions per term
- **Designed high-coverage verification frameworks** for **50+ static analysis passes**, building automated regression pipelines with **pytest, pylint, mypy, and pycodestyle** to improve analyzer correctness, reduce false positives, and strengthen runtime contract verification

Projects

VibeForge - Social discovery platform for AI-built applications | *TypeScript, Next.js, React, Tailwind CSS, Supabase*

- Architected a **full-stack AI application marketplace** on **Next.js**, enabling creators to publish, categorize, and discover AI-built products across a modern marketplace interface backed by **Supabase Auth** and **PostgreSQL**
- Implemented **Supabase Row-Level Security** to enforce **per-creator data isolation at the database layer**, pairing metadata schemas, asset storage rules, and product discovery flows to support **scalable creator profiles** and marketplace expansion

RESUmate - AI-Powered resume scanner for ATS optimization | *JavaScript, HTML/CSS, PDF.js*

- Engineered a **full-stack ATS resume analyzer** that scores uploaded **PDF resumes** against job descriptions, surfacing **missing keywords**, section-level feedback, ATS match insights, and **AI-generated bullet rewrite suggestions**
- **Built the resume intelligence pipeline** from PDF parsing to keyword extraction, ATS-style scoring, section-level analysis, and structured JSON feedback, **connecting a Node.js backend with a Next.js frontend** to deliver **low-latency** resume evaluations
